Experience

Jan 2024 – present

Fullstack Developer | Nexus Aurora

- Managed server deployments, meticulously preparing environments encompassing database setup, server proxy configuration (e.g., Nginx), and frontend-backend integration.
- Successfully delivered projects utilizing diverse frontend technologies
- Facilitated knowledge sharing sessions to enhance the skills and capabilities of junior team members.

Apr 2023 – Dec 2023

Frontend Engineer & designer | Utopia

- Lead for Front-End Development, taking on a pivotal role in shaping design and development landscape.
- Responsible for strategic decisions encompassing design choices, front-end methodologies, and technology stack selection.
- Designed and developed a live streaming platform with Vue.js to accommodate a large audience.
- Worked with various versions of Vue.js and complementary technologies and UI libraries to enhance development versatility and efficiency.

Apr 2022 – Apr 2023

Front end Engineer At CEIT

- Collaborated with UI/UX team to transform diverse mockups into interactive web interfaces.
- Contributed to architectural decisions and technical planning for frontend projects, ensuring scalability and maintainability.
- Developed responsive, mobile-friendly UI designs for consistent experience across devices.
- Implemented Git-powered version control for collaborative code management.
- Worked closely with backend developers for seamless integration with APIs.
- Optimized frontend code for faster loading and better performance.
